SAQUIB SALIM KIDWAI

Kanpur, India | +91 95543 17570 | Email | GitHub | LinkedIn

Software Engineer | Final-Year B.Tech (AI & Data Science), 2027

PROFESSIONAL SUMMARY

Final-year CS/AI & Data Science undergraduate with strong foundations in Data Structures, Algorithms, OOP, and SOLID design across C++, Java, and Python. Built full-stack apps (React.js, Flask, REST APIs, MySQL) and ML systems (TensorFlow, PyTorch, CV, NLP), with hands-on exposure to automated testing (Postman, pytest), CI/CD (GitHub Actions), Git, Docker, and AWS/GCP. Certified by Stanford, AWS, Google Cloud, and Databricks. Seeking a Software Engineer internship to apply strong problem-solving and system design skills to production-scale products.

TECHNICAL SKILLS

- **Languages:** C++, Java, Python, JavaScript, C, SQL, Bash.
- **Data Structures & Algorithms:** Arrays, Linked Lists, Trees, Graphs, Sorting, Searching, Dynamic Programming, Recursion, Hashing, Time & Space Complexity Analysis, Competitive Programming
- **Software Design:** Object-Oriented Programming (OOP), SOLID Principles, Design Patterns, System Design fundamentals, Distributed Systems, Microservices
- **Web & Backend Development:** REST APIs, Node.js fundamentals, Flask, React.js, HTML5, CSS3, JavaScript, MySQL, MongoDB
- **Machine Learning & AI:** TensorFlow, PyTorch, Keras, Scikit-learn, OpenCV, MediaPipe, NLP (NLTK, spaCy), CNNs, Generative AI, Model Training & Evaluation
- **Testing & Quality:** pytest, Postman, unit/integration/end-to-end testing concepts, mocking & stubbing, CI/CD test automation
- **Cloud, DevOps & Tools:** AWS, Google Cloud Platform (GCP), Docker, Linux, Git, GitHub Actions (CI/CD), Agile/Scrum, VS Code, Jupyter Notebook, Unity/ARCore

PROJECTS

Gesture-Controlled AR & Perception Pipeline *Jul 2026 – Present*

Python, OpenCV, MediaPipe, TensorFlow, Unity/ARCore, C# | GitHub Repository

- Built a real-time computer vision inference pipeline with deep-learning-based gesture recognition for pinch, swipe, and zoom interactions, achieving low-latency perception for robotic/AR interfaces.
- Applied Object-Oriented Design and SOLID principles across Unity/ARCore C# modules, designing a scalable, maintainable, and testable architecture; owned the module end-to-end from design through deployment.

AI-Powered Mock Interview Platform *Feb 2026 – Jul 2026*

Python, TensorFlow, NLP, Flask, React.js, MySQL, GitHub Actions, pytest, Postman | GitHub Repository

- Designed and deployed an end-to-end NLP-driven machine learning pipeline with real-time model evaluation, backed by a React.js frontend and a Flask REST API with live dashboards for scoring and inference-quality observability.
- Set up a CI/CD pipeline with GitHub Actions running automated API and end-to-end tests (pytest, Postman) on every change, covering valid, invalid, and missing-input scenarios to keep deployments reliable and repeatable.

Data Structures & Algorithms Visualizer *Sep 2024 – Dec 2024*

JavaScript, React.js, D3.js | GitHub Repository

- Implemented 10+ core algorithms (BFS, DFS, Merge Sort, Binary Search) with interactive D3.js visualizations and real-time execution controls, reinforcing strong data structures and algorithms fundamentals.

Fake News & Spam Detection — ML Training Pipeline *Mar 2025 – Oct 2025*

Python, Scikit-learn, TF-IDF, NLP, Flask, React.js | GitHub Repository

- Built a complete ML training pipeline — data collection, preprocessing, TF-IDF vectorization, multi-model training (Naive Bayes, Logistic Regression), evaluation, and optimization — deployed via a Flask + React.js application, tracking performance metrics (accuracy, precision, recall) at each stage.

EDUCATION

Pranveer Singh Institute of Technology, Kanpur — B.Tech (Bachelor of Technology), AI & Data Science *2023 – 2027 (Expected)*

CGPA: 6.82 / 10 (through 6th semester)

Super International School, Kanpur — CBSE Class XII | 74% *2020 – 2021*

B.G. Public School, Kanpur — ICSE Class X | 81.4% *2018 – 2019*

CERTIFICATIONS | Certificate Repository

- Stanford Online (Andrew Ng): Machine Learning Specialization — Supervised, Unsupervised & Reinforcement Learning
- DeepLearning.AI: Supervised ML | Advanced Learning Algorithms | Unsupervised Learning, Recommenders & RL
- AWS: Fundamentals of Machine Learning • Google Cloud: Introduction to Generative AI Studio • Databricks: Introduction to Generative AI
- Apna College: Advanced DSA with C++ | DSA with Java • Infosys: Programming Fundamentals — Python, HTML5, CSS3
